

Case Study

5 Working Days

When you are buying a house and a mortgage report is requested on the trees you want it as fast as possible. We guarantee a 5 working day turnaround.

Subsidence Assessment

We use our experience and known underlying soil data to assess if there is a risk. We then inspect the trees and give clear guidance on exactly what tree works are required (if any).

Tree Safety

Tree surgery can be expensive. Included in our survey is a detailed assessment of whether any trees are dangerous. If they are we give clear guidance on what works should be undertaken before you complete.

Major Insurers & Lenders

Our reports are accepted by all the major insurers and lenders.

“The report was clear and concise and we had it as we needed it, quickly....Many thanks.”
